## ULTRAGENERAL CLEANING

## D-Odor

### DESCRIPTION

The secret behind Ultra Chem Labs' 'D-Odor' is its unique "Odor encapsulation" technology. This provides "D-Odor" with the distinct ability to not just mask an odor like conventional odor fresheners, but encapsulates and eliminates odors completely, classifying 'D-Odor' as an official Malodor eliminator. This non-toxic, biodegradable product can be used as an additive in carpet extraction solutions, mop water, wash cycle in

laundry operation or smoke restoration and can be applied to eliminate a wide range of malodor odors such as pet odors, cigarette smoke and smoke from fires. Primarily, D-Odor' has made it possible for Ultra Chem Labs to meet the most stringent environmental standards in aerosol reduction policy that allows 'D-Odor' to effectively and efficiently eliminate malodor odors with no potential of environmental degradation.

### DIRECTIONS

Use as an additive to carpet extraction solution, mop water, rinse cycle in laundry operations smoke restorations cleaning and as a very economical space spray. Use at 1:256 to 1:128 (1/2 to 1oz per gallon, 4ml to 8ml per liter) as an additive to Ultra Carpet Care 'Clean'. Ultra Carpet Care 'Extract' or mop water. Dilutes economically for general space spray odor counteracting at 1:128 to 1:64 (1 to 2 oz per gallon, 8 ml to 16 ml per liter). 'D-Odor' may be used at higher dilutions for the toughest of malodors.

This product meets Terrachoice's Ecologo environmental standard for industrial and institutional cleaners based on its reduced human and aquatic toxicity and reduced smog production potential.
