

# Liquid Extract

Carpet and Upholstery Liquid Extraction  
Tapis et Rembourrage Désolvation  
Extracción de Líquido de Alfombra y Tapicería

### Efficient:

- Traffic lane cleaner
- Portable extraction cleaner
- Truck mount extraction cleaner
- Pad/bonnet cleaning
- Spill & spot remover
- Pleasant aroma
- Removes odors

### Eco-Friendly:

Certified by EcoLogo (TerraChoice)

### Economic:

Low dilution 2-8 oz/gal

## ULTRACARPETCARE

# Liquid Extract

## DESCRIPTION

The secret behind Ultra Chem Lab's 'Liquid Extract' is its unique Electrolytic Cleaning Technology which cleans deep into all types of fibers and fabrics including new generation carpet fibers. This technology's primary benefit is to completely return the fibers and fabrics back to its original state of ionic neutrality, therefore substantially decreasing the amount of times necessary for cleaning. Your fabrics and upholstery's will stay significantly cleaner and longer than ever. However, this unique cleaning technology does not only enhance the aesthetic vibrancy of all types of upholstery and carpets,

'Liquid Extract uses a fast acting emulsifier and soil suspender formula that completely enriches the fibers leaving them soft, supple and smelling fresh like the first day it was walked on. Ultra Chem Lab's has made it possible to obtain these results and more by providing a high concentrate formulation that requires very little water which drastically decreases drying time. Importantly, 'Liquid Extract' is an environmentally safer product specialized for portable and truck mount extractors. Overall, 'Liquid Extract' is a high quality product that removes the guess work for all of your carpet cleaning needs.

## DIRECTIONS

Do not mix or use any conventional chemicals together with the electrolytic technology. Flush and rinse out all tanks, lines, etc., of conventional chemical residue prior to using 'Liquid Extract.' Liquid Extract can be used in truck mounts or portable extraction equipment. Extract can also be used to economically launder mop heads, rags, etc. Dilution with cold water from the tap is recommended. Use Ultra Carpet Care 'Neutralizer' to remove residuals if the carpet has been previously cleaned with conventional carpet cleaners. For best results, use in conjunction with Ultra Carpet Care 'Clean.'

### For Truck Mount Systems:

Mix with cold water 1:128 to 1:16 (1 to 8oz per gallon, 8 to 64ml per liter) meter this solution at 2 gallons per hour (i.e. 3/4 to 1 oz per 10 gallons of water at the wand.)

### For Portable extractors:

Mix with cold water 1:128 to 1:16 (1 to 8 oz per gallon, 8 to 64 ml per liter) directly in the solution tank.

This product meets Terrachoice's Ecologo environmental standard for industrial and institutional cleaners based on its reduced human and aquatic toxicity and reduced smog production potential.
