

# Neutralizer

Acidic Rinse & Residue Remover

Removedor de Residuo y Neutralizador

### Efficient:

- Neutralizes malodors
- Neutralizes chemical residue
- Leaves the surface smooth
- Easy to clean and maintain
- Easy to apply

### Eco-Friendly:

- Certified by EcoLogo (TerraChoice)
- Contains food grade acids

### Economic:

- Low dilution 1-4oz per gallon

## ULTRACHEM LABS

Technology Working For You

Research, Development, Manufacturing & Marketing Of

- Floor Care Systems
- Carpet Care Systems
- Disinfectants And Multipurpose Cleaners
- Laundry Systems
- Warewash Systems
- Made To Be Safer For People, Property, & The Environment

Is 9001 Registered / Certificate #97-483

## ULTRACARPETCARE

# Neutralizer

## DESCRIPTION

Ultra Chem Labs' 'Neutralizer' is a further addition to a line of products that personify high performance and technological advancement. 'Neutralizer' utilizes 3 food grade acids to neutralize the effect of 'Stripper's' Selective Implosion Technology. This unique blend of special food grade acids will outperform various hazardous chemicals such as hydrochloric acids and non-food grade phosphoric acids. Unlike conventional neutralizers, 'Neutralizer' is not designed to rely on evaporation of residual acid when the floor is over neutralized. And due to its mild aroma and unique effectiveness, 'Neutralizer' can be used against various

malodor odors such as urine stench or others that have been confined in areas of poor ventilation where odors are a primary concern. Combined with 'Cleaner and Conditioner' equipped with 'Electrolytic Cleaning Technology', 'Neutralizer' becomes an extremely effective formula against ice melt residue and has proven to be a successful and powerful grout cleaner. As a result of its multiple applications, 'Neutralizer' is an easy to manage, environmentally safer product that has no lack of accomplishment and success in its application for users and the environment.

## DIRECTIONS

Use with cold water only.

After stripping, mix Neutralizer at 1:128(1oz per gallon, 8ml per liter) for regular use and 1:64 (2oz per gallon, 16 ml per liter) for heavy-duty use. Flood coat the floor and let Neutralizer sit for 1 to 2 minutes. Pick up the Neutralizer and then give the floor a clear water rinse. As an integral part of the Ultra Floor Care System, neutralizes the effort of Ultra Floor Care Stripper's selective chemical implosion. Other neutralizers are not designed to achieve this safety factor. For grout and concrete cleaning, use 1:1 to undiluted.

This product meets Terrachoice's Ecologo environmental standard for industrial and institutional cleaners based on its reduced human and aquatic toxicity and reduced smog production potential.
