Low dilution 2-8 oz/gal

- Floor Care Systems
- Carpet Care Systems
- Disinfectants And Multipurpose Cleaners
- Laundry Systems
- Warewash Systems
- Made To Be Safer For People, Property, & The Environment

Clean

DESCRIPTION

The secret behind Ultra Chem Lab' 'Carpet 'Clean' is it's unique Electrolytic Cleaning Technology which cleans deep into all types of fibers and fabrics including new generation carpet fibers. This technology's primary benefit is to completely return the fibers and fabrics back to its original state of ionic neutrality, therefore substantially decreasing the amount of times necessary for cleaning. Your fabrics and upholstery's will stay significantly cleaner and longer than ever. However, this unique cleaning technology does not only enhance the aesthetic vibrancy of all types of upholstery and carpets, it completely enriches the fibers leaving them soft, supple and smelling fresh like the first day it was walked on. 'Cleans" fresh smelling results come

from the use of special fabric softeners and natural odor counteractants to provide optimal satisfaction for the senses.

Ultra Chem Labs has made it possible to obtain these results and more by providing a high concentrate formulation that requires very little water which drastically decreases drying time. Importantly, 'Clean' can be used as a pre-spray conjunction with white polyester floor buffing pads which "out cleans" the conventional cotton bonnet. This special feature of 'Clean' has proven to significantly reduce labor costs and efforts. Overall, 'Clean' is a high quality product that removes the guess work for all of your carpet cleaning needs.

DIRECTIONS

Pad/Bonnet Cleaning:

Mix with cold water 1:128 to 1:16 (1 to 8 oz. per gallon, 8 to 64 ml per liter). Traffic Lane Pre-Spray: Mix with water 1:128 to 1:16 (1 to 8 oz. per gallon, 8 to 64 ml per liter).

Spot and Stain Removal:

Mix with cold water 1:13 (10 oz. per gallon, 80 ml per liter) for regular spot and stain removal; 1:4 (32 oz. per gallon, 256 ml per liter) for medium spot and stain removal; and 1:1 to undiluted for tough stains and gum. Upholstery

Cleaning:

LIGHT SOIL mix with cold water 1:128 (1 oz. per gallon, 8 ml per liter), HEAVY SOIL mix with cold water 1:32 to 1:21 (4 to 6 oz. per gallon, 32 to 48 ml per liter).

This product meets Terrachoice's Ecologo environmental standard for industrial and institutional cleaners based on its reduced human and aquatic toxicity and reduced smog production potential.
