Title: Nothing But Green Living Enterprises, LLC has been recognized as a New Jersey Sustainable Business

Article:

Small businesses across New Jersey are starting to save money, share their successes and inspire other businesses by implementing sustainable business best practices. Joining this list of small businesses, Nothing But Green Living which is located in Mount Laurel, New Jersey, became one of the first businesses in the state to be recognized as a New Jersey Sustainable Business.

In August of 2014, the New Jersey Small Business Development Centers (NJSBDC) launched the New Jersey Sustainable Business Registry. The registry is an Internet site where businesses that have implemented sustainable business practices can register their achievements and be recognized.

Nothing But Green Living and the Ultra Chem Floor program has achieved recognition: The North Caldwell Board of Education switched to the Ultra Chem Floor Care System hoping to meet 3 primary objectives. Eliminate the need for floor stripping each summer, saving us time when time is at a premium. Reducing our chemical costs dramatically. This floor care program has met both our objectives; by eliminating the floor stripping process which has saved us 40% in time/labor. We are now top coating each summer, we've reduced our total finishing costs by 60%. Additionally we feel the Ultra Pearl finish gives us a deep clean shine, with durability unmatched by any other finishes. Also all the products including Cleaner / Conditioner used on the floors and other surfaces are environmentally sound, and have helped us to meet our goals of going green. The Ultra Chem Floor program has reduced approximately 3000 lbs of sludge and has saved us approximately \$2,167 a year.

Our mission is to reduce the carbon footprint one floor at a time. We at Nothing But Green Living, affirm our belief that our company and its employees have a responsibility to take a leadership role in conducting activities as responsible stewards of the physical environment and using green activities to promote environmental awareness, local action and global thinking.

Our products do not have any Styrene, Zinc and low VOC's in them. These are some of the negative elements in floor finishes, when a floor is scuffed these bad elements are released into the environment and we breathe them in. These bad elements can cause respiratory concerns and health problems.
